

## **Postdoctoral position: Agronomy**

Institute of Food and Agricultural Sciences  
University of Florida

### **Position Summary:**

A postdoctoral position is available to conduct research on agronomic management of *Brassica carinata* cropping systems in the Florida panhandle. The research will include many aspects of agronomic production, including weed science, tillage, rotations, nutrient management and entomology. This is an applied, field- and farmer-based research program.

The research will be conducted at the UF/IFAS [West Florida Research and Education Center](#) (WFREC) located north of Pensacola, Florida. The WFREC research unit consists of 640 acres and is located about 12 miles north of Milton near Jay, FL (Lat 30.776657°, Long -87.141633°), where research is conducted on cropping systems, weed science, entomology, golf and sports turf management, landscape and nursery management, forestry, and wildlife ecology. Graduate student housing facilities, suitable for temporary housing, are conveniently available on the research station, though the incumbent is expected to find housing locally.

Carinata is a non-food oilseed crop used to manufacture jet biofuel. USDA NIFA awarded [\\$15 million](#) to develop the crop as a renewable source of jet fuel in the Southeastern US. Limited acreage is already under production in the Southeast, but critical questions must be addressed to optimize production. This research will address agronomic management of carinata in the Southeast using a multidisciplinary approach to generate new production technologies and effectively incorporate them into commercial production. The research project includes but is not limited to successfully introducing carinata into existing crop rotations, optimize soil and weed management under different tillage systems, and develop production decision-making tools for growers. The research will be conducted at the UFL WFREC campus in Jay, FL. Dr. Mulvaney has a 60% Research and 40% Extension appointment, so participation in Extension programming is available and expected.

### **Responsibilities will include:**

- Publish peer-reviewed and extension publications;
- Conduct field and laboratory research on carinata production relevant to farming systems in the region;
- Present research findings to scientific, farmer and lay audiences;
- Assistance and oversight of Ph.D. and M.S. research projects;
- Some financial management of large subawards;
- Travel to other research units as needed; and
- Writing, reviewing, and editing extension and peer-reviewed publications.

**Required Qualifications:**

- Ph.D. in Agronomy, Crop Science, Soil Science, Weed Science or a closely related field of study that has equipped the applicant with the necessary knowledge, skills, and abilities to perform the duties and responsibilities of the position
- Excellent written and oral English skills
- Strong analytical and statistical skills
- Self-motivated, meticulous and highly organized
- Willingness to conduct field research away from the Gainesville campus
- Driver's license, or the ability to obtain one
- A pesticide license within 60 days of hire

**Preferred Qualifications:**

- Agricultural field experience
- Familiarity with farming equipment
- Strong laboratory skills
- Excellent public speaking and presentation skills
- Grant management experience

**Benefits:**

- Remuneration at US\$47,476+/yr
- Participation available in Health, Dental, Vision plans, as well as supplemental plan availability
- Additional benefits information is available at the [UF benefits website](#)

**How to apply:**

Contact Dr. Michael J. Mulvaney at [m.mulvaney@ufl.edu](mailto:m.mulvaney@ufl.edu) for more information. For consideration, the following documents must be sent to Dr. Mulvaney as a single application package. Incomplete application packages will not be considered.

- CV
- Cover letter explaining your career interests and qualifications
- GRE scores and year taken
- TOEFL scores, if English is not the native language
- Official or unofficial academic transcripts
- Three letters of reference

Review of candidates will begin immediately and continue until a suitable candidate is appointed. It is anticipated that the incumbent will begin during the Fall 2018 semester, although earlier employment will also be considered.

Final candidate will be required to provide official transcripts to the hiring department upon hire. A transcript will not be considered "official" if a designation of "Issued to Student" is visible. Degrees earned from an education institution outside of the United States are required to be
