SILVICULTURE (FOR 3162C)  
Course Syllabus - Spring 2015

INSTRUCTOR  
Dr. Kimberly Bohn  
Office: Bldg 4900, Room # 4919  
tel: 850-983-7129 (office); 850-377-2854 (cell)  
email: kkbohn@ufl.edu

TEACHING ASSISTANT  
Justin McKeithen  
Office: NRC Lab, Jay Research Facility  
tel: 850-983-7111 (office); 850-776-7009 (cell)  
email: justmck@ufl.edu

OFFICE HOURS  
I have an open door policy- if I am in, we can talk. Or, if you want to ensure that they will be available, contact them ahead of time (phone, email or see me after class) to set up an appointment.

MEETING TIMES  
Wednesday 5 – 8:00 pm, Room 4814  
4 Saturday field labs

CREDIT HOURS  
This is a 4 credit “C” course, which means there is a lab associated with this course.  
Three credits of lecture = three hours of contact time per week  
One credit of lab = a minimum of two hours of contact time per week  
Total contact hours for a 15 week course = 75 hours;  
45 hrs during regular Wednesday class time, 30 hrs distributed across 4 Saturday labs

PREREQUISITES  
Prereq: FOR 3253C or PCB3034C, FNR 3131C or equivalent.

PURPOSE OF THE COURSE  
Silviculture is the ‘art and science’ of creating and maintaining communities of trees to meet specific objectives on a sustainable basis. This course will cover the principles for establishing, tending, and regenerating stands in the context of various ecological, economic, and social considerations. Students will develop a broad understanding of the silvicultural concepts and applications needed to manage forest stands for a variety of commodity and non-commodity values. Some of the values to be addressed in this course include timber production, wildlife habitat, water quality, recreation, forest health, and ecosystem restoration. Emphasis will be placed on, but not limited to, silvicultural systems of the Southeast.

OBJECTIVES AND GOALS  
By the end of the course, students should understand the following concepts and techniques:  
• Effects of site and silvics on silvicultural systems  
• Natural and artificial regeneration  
• Site preparation (mechanical and herbicide treatments, prescribed fire)  
• Even-aged silviculture (intermediate treatments and reproduction methods)  
• Uneven-aged silviculture

Upon successful completion of the course, the students will also be proficient in the following skills:  
• Inventory forest stands using standard forestry equipment  
• Develop treatment prescriptions  
• Use excel and/or other computer programs to analyze forest inventories and make calculations  
• Written communications
SILVICULTURE (FOR 3162C)  
Course Syllabus- Spring 2015

FORMAT
This is a 4-credit course, consisting of instruction in both the classroom and the field. This course emphasizes both concepts and skills. We will use the class meeting time for formal instruction including lecture/discussions and class activities, which will include practice scenarios (group discussion of silvicultural recommendations), calculations, or computer activities. Reading Guides will be provided ahead of time as a guideline for the next week’s discussion to allow you to prepare for the weekly quiz and to gather your thoughts so you can actively participate in class.

The Saturday field labs will reinforce and strengthen concepts learned in class through observation of silvicultural systems on the landscape and through hands-on activities. During some labs we will observe and discuss silvicultural treatments in the field and/or meet with regional land managers. During other labs, we will additionally collect field data to be analyzed and presented.

REQUIRED MATERIALS

Supplemental chapters and journal articles will be distributed by the instructor or posted online.

RECOMMENDED MATERIALS
Calculator, flash drive, laptop computer

ELECTRONIC COMMUNICATIONS
There is a CANVAS e-learning site available for this course. Lecture slides and other handouts will be posted no later than Monday afternoon, and should be printed prior to the start of class. Additional handouts may be provided in class by the instructor. Most assignments will also be submitted via CANVAS unless otherwise noted. On occasion, I will send an announcement through CANVAS or by email regarding updates to the syllabus or clarifications of assignments.

EVALUATION AND PERFORMANCE CRITERIA

<table>
<thead>
<tr>
<th>Assignment</th>
<th>% of final grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quizzes (11); lowest grade dropped</td>
<td>11</td>
</tr>
<tr>
<td>FVS exercises (4)</td>
<td>20</td>
</tr>
<tr>
<td>Lab Reports (4)</td>
<td>36</td>
</tr>
<tr>
<td>Exams (3)</td>
<td>33</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>100</strong></td>
</tr>
</tbody>
</table>

Letter grades will be assigned as follows: A (93-100), A- (90-92), B+ (86-89), B (83-85), B- (80-82), C+ (76-79), C (73-75), C- (70-72), D+ (66-69), D (63-65), D- (60-62), E (<60)

A complete explanation of the UF Grading policies can be found at:  
http://www.registrar.ufl.edu/catalog/policies/regulationgrades.html

At the very minimum, the student is expected to attend class, complete all assignments on time, and be able to define the key concepts of forest ecology in lab reports, exams, and presentations. Evaluation of written and oral assignments will reward accuracy, thoroughness, clarity and organization. Grading “rubrics”, which describe requirements of the assignment, will be handed out prior to the due date. It is in your best interest to read and follow these instructions carefully.
Excuses for late work and absences—Assignments submitted electronically by 5 pm on the due date or on paper at the start of the class period are considered on time. After 5 pm, late assignments will lose value at the rate of 10% each day (weekend days count too!). In cases of extended illness or family emergencies, arrangements to make up missed exams or turn in late assignments must be made with the professor prior to the due date.

Saturday field labs are mandatory and necessary to complete the lab report assignments. Students who intend to miss lab and have a valid excuse must contact the instructor at least 2 weeks in advance to make arrangements for an alternate assignment (typically a 5 page paper on the topic of the lab in addition to any calculations of data collected during that lab period). Students who miss lab without prior arrangements, or notification within one day of the missed lab, will lose at least 50% of the lab report grade for that lab.

Policy on lateness to class- Late arrivals will not be tolerated. Students arriving more than 10 minutes into the class session will not be allowed to make up the quiz unless prior arrangements are made, and will not be allowed into the classroom until the next available session break.

DESCRIPTION OF ASSIGNMENTS

Quizzes
A brief quiz will be given at the start of the discussion portion of class. The quiz is intended to evaluate your comprehension of the reading material. The format may vary between short answer (3 sentences), matching, multiple choice, and/or definitions. Quiz questions typically come directly from the Reading Guides. The lowest quiz grade will be dropped.

Forest Vegetation Simulator (FVS) Exercises
We will use FVS model to simulate the effect of different silvicultural scenarios (e.g. thinnings and regeneration method) on the stand structure and other attributes. You will turn in the FVS model outputs generated with Stand Visualization System (SVS, a component of FVS model) and compare the different scenarios in a short report.

Lab Reports
Lab reports will include a summary of observations made and information presented during the Saturday labs, as well as calculations and silvicultural prescriptions based on a particular data set. Some data will be collected in the field, while other data sets will be handed out during class. We will work on calculations during the class period, and the formal report will address the following components: an introduction of the conceptual background of the silvicultural methods used, target values or objectives of the treatment, the site description (if applicable), ‘methods’ for devising the prescription (what data was collected, how it was analyzed, etc), results of any analysis, the silvicultural prescription, and intended outcomes. Grades will be based on the content of written material, accuracy of calculations when appropriate, and writing (grammar, structure, etc)

Exams
The exams are intended to evaluate your understanding of the conceptual material, and to demonstrate your critical thinking and problem solving skills in applying these concepts and techniques under a variety of landowner objectives. The format of the exam will primarily be short answer (3-4 sentences). Another 10-20% of the exam will require long answers (1-2 paragraphs) in which you will describe silvicultural recommendations in a variety of ‘scenarios’. The last exam is cumulative, but will primarily cover materials from the last third of the course.

CODE OF CONDUCT
All students are expected to abide by the Student Honor Code as described in the Student Handbook (http://www.dso.ufl.edu/studentguide/studenthonorcode.php). Students are expected to behave in a professional and courteous manner towards the instructors and other classmates.

Special note: If your cell phone rings, buzzes or beeps during class, I will take it away for the remainder of the class period. Please shut them off completely and put them away.

Finally, plagiarism is taken very seriously at this institution, and can result in a reduced grade, failure of the course, and possible dismissal from the college. Plagiarism includes: 1) the direct use of any written material (including internet sites!!) without proper quotations and citation or 2) the submission of a document, in part or wholly authored by someone other than the student. Please take special caution when reviewing and summarizing a journal article or book that your words are your own. If you are not sure what constitutes plagiarism, please come see me. It is up to the professor to evaluate the severity of any infraction and to determine the disciplinary action to be taken. The student should also be aware of his/her legal rights as defined in the Student Honor Code.

UNIVERSITY SERVICES
You have full access to all the student services available through the University of Florida, including:

Disability Resource Center: Students requesting classroom accommodation must first register with the Dean of Students Office. The Dean of Students Office will provide documentation to the student who must then provide this documentation to the Instructor when requesting accommodation

University Counseling Center, http://www.counsel.ufl.edu/, 310 Peabody Hall, 352-392-1575, personal and career counseling

Student Mental Health, Student Health Care Center, http://shcc.ufl.edu/smhs/, 352-392-1171, personal counseling

Sexual Assault Recovery Services, Student Health Care Center, http://shcc.ufl.edu/care/, 352-392-1161, assault recovery counseling

Career Resource Center, http://www.crc.ufl.edu/, Reitz Union, 352-392-1601, career development assistance and counseling

Online Course Evaluation Process
Student assessment of instruction is an important part of efforts to improve teaching and learning. At the end of the semester, students are expected to provide feedback on the quality of instruction in this course using a standard set of university and college criteria. These evaluations are conducted online at https://evaluations.ufl.edu. Evaluations are typically open for students to complete during the last two or three weeks of the semester; students will be notified of the specific times when they are open. You will have an opportunity to complete evaluations during the class period on the last day of class. Summary results of these assessments are available to students at https://evaluations.ufl.edu/results.
